Tougher Choices Direction Signing

Bolder 5 Year Direction

- As part of the bolder 5 year direction a DO NOT REPLACE sign list was created and published in the EPG.
- There really wasn't any one sign that was an "absolute" do not replace that didn't have a loophole for its use
- As a result, the list was not faithfully followed

325 Signing Team

- There were many ideas looked at during the 325 team evaluation for signs
- One that caught a lot of attention by Senior Management was “enforce the do not replace list”
- It was viewed as something that should have been taking place all along
- The commitment was made to do so moving forward

Tougher Choices Direction

- Many of the same items on the old NO NOT REPLACE LIST carried over to the new direction
- Some new signs were added
- EPG guidance for each sign is not finalized, implementation is already underway as sign orders are reviewed
- This has generated two distinct sign lists:
 - DO NOT REPLACE
 - LIMITED USE
