TYPICAL COMPUTATION FOR ACTUAL HAUNCH

Theoretical Elev. (A) = (P.G.) − (T) − (H) + (t) + (Y)

Record Field Elev. (A)

   (1) If Field Elev. (A) is greater than Theoretical Elev. (A),
       Reduce (H) by Difference

   (2) If Field Elev. (A) is less than Theoretical Elev. (A),
       Increase (H) by Difference
