Required Clear-Zone Distance
(based on recoverable slope)

Through Traveled Way	Shoulder	Recoverable Slope	Non-recoverable Slope	Clear Runout Area*
		1V:4H or Flatter Slope (1V:6H or Flatter Desirable)	Slopes Between 1V:3H & 1V:4H	1V:6H or Flatter Slope Desirable

* The Clear Runout Area is additional clear-zone space that is needed because a portion of the Required Clear Zone (shaded area) falls on a non-recoverable slope. The width of the Clear Runout Area is equal to that portion of the Clear Zone Distance that is located on the non-recoverable slope.
