

MEMORANDUM

Missouri Department of Transportation Design Division Central Office

TO: Construction and Materials – All Districts

FROM: Environmental – Hazardous Waste

DATE:

This packet is provided by MoDOT to contractors and sub-contractors to ensure communication of environmental compliance procedures while blasting and painting bridges. The responsibility falls on the contractor to ensure compliance with all procedures.

Please provide the following attachments to any Contractor at all bridge painting jobs in the pre-construction meeting **BEFORE** the project begins.

The 1081 requires a Safety Data Sheet (SDS) of the blast media be brought to the pre-construction meeting. Be sure a copy of this is also received and attached to this packet. The only acceptable blast media is steel grit or sand.

Was the SDS provided and approved? YES NO
Please attach a copy of SDS to this packet.

Attachments:

- 1) 1081 Procedures
- 2) Bridge Inspection (MoDOT inspector/or contracted inspector should complete 3 of these (start, middle, and end of job))
- 3) Provide labels for blast media waste on 55-gallon drums. Directions of how to order more labels attached.
- 4) Missouri DNR approval letter obtained by MoDOT for your files
- 5) Blast media SDS – provided by the contractor
